

# Update on Fairmont Brine Processing Site

December 2023

EPA is coordinating with the WV Department of Environmental Protection, the WV Department of Health and Human Resources and Marion County Department of Homeland Security and Emergency Services to take actions to mitigate the release or potential release of hazardous substances from the facility.

EPA and its contractors have posted "NO TRESPASSING" signs at the Site. Trespassers will be reported to law enforcement.

Based on current radiological data obtained at the Fairmont Brine site, none of the data collected suggests that there are measurable health impacts to the public resulting from the May 2023 fire. Individuals that would like to discuss specific health concerns may reach out to the West Virginia Department of Health and Human Resources, Bureau for Public Health's Office of Environmental Health Services Radiological Health Program at 304-558-2981.

For more information about the Site, scan the QR Code with your smartphone or visit the website below.

fairmontbrine](https://response.epa.gov/fairmontbrine)

EPA has established a public phone line for additional questions and concerns pertaining to the site at (800) 438-2474.

The phone line is staffed Monday - Friday from 8:30 a.m. to 5:30 p.m. EST.
