

Trowbridge Dam Cleanup Update – September 2024

IMPORTANT NOTICE !!!

The boat launch at 26th Street will be closing on Friday, September 20, 2024.

Crews are currently working to change this space into a staging area for the Kalamazoo River cleanup project. Another staging area is under construction on the north side of 108th Avenue just west of 26th Street.

Trucks are bringing in equipment and materials to both of these areas. We will put up orange traffic signs up to remind motorists of potentially slow-moving trucks entering/exiting the entrances off 26th Street and 108th Avenue. All trucks should keep to the posted speed limit for safety and dust control. If you see speeding or reckless driving, please contact us right away.

Recreational users of the river will be encouraged with signs and warning buoys to exit the river at Pine Creek and/or Fox Mountain/Bittersweet public access areas beginning later this month. **There will be no way to pick up canoes or kayaks at the 26th Street boat launch after September 20, 2024, and this area is expected to be under construction for the next several years.**

If you have any questions or concerns, please contact us. You can also obtain updates and more information at: <https://response.epa.gov/trowbridgedam> or by scanning the code below with your cell phone's camera feature:

Thank you for your patience with our progress as we work to clean up the river.

Respectfully,

Paul Ruesch
