<b>RCRIS ID #:</b>			

**Site Description**

See POLREP #1 for a full Site Description.

**Current Activities**

CRA completed a free product investigation on behalf of the respondent group that included:

1. On site and off-site subsurface laser-induced fluorescence (LIF) coupled with soil borings to confirm LIF screening/responses and define the extent of free product.
2. Installation of two 4-inch diameter monitoring wells in areas previously identified free product areas.
3. A free product bail-down test.
4. Periodic free product monitoring.

On April 14, 2010, CRA submitted a revised Site Investigation Report on behalf of the respondent group that summarizes all removal and investigation actions performed to date; and evaluation of additional removal options.

**Planned Removal Actions**

To be determined following evaluation of the proposed removal options.

**Next Steps**

1. Review and evaluate the removal options proposed in the revised Site Investigation Report to determine the most prudent course of action.
2. Discuss preferred removal options with the respondent group and City of Dearborn.
3. Follow through with preferred/selected removal option.

**Key Issues**

The site continues to be PRP-lead.
