Site Description

The incident involves an ongoing discharge of crude oil into Boyd's Creek and the Barren River Lake which is a navigable waterway. This ongoing removal action was continued under an Interagency Agreement between EPA Region 4 and the Tennessee Valley Authority. Funding was obtained under the OSC's OPA authority and through support from the National Pollution Fund Center in December, 2008.

Current Activities

TVA continued conducting monthly site visits to the Boyds Creek Site in December 2011 and January 2012. Approximately 2,165 gallons of oil were collected from the collection sump. Based on historical data over the past few years it appears that these large amounts of oil normally come in the November to January timeframe. All routine checks of the collection system were performed and no issues were noted. The local oil vendor, Barrett Oil, met TVA on site and hauled the crude oil from storage.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
IAGs	\$50,000.00	\$34,000.00	\$16,000.00	32.00%
Intramural Costs				
Total Site Costs	\$50,000.00	\$34,000.00	\$16,000.00	32.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
